**Start:** 2/13/2018 9:30:00 PM  
**End:** 2/13/2018 10:30:00 PM  
**Show Time As:** Busy

Below is the update from Jason on the sampling, we will discuss at this meeting and hopefully have another update.

Pre-construction testing results should be available during the week of 2/5. During a EPA/GSA discussion yesterday on 2/1 it was verbally confirmed that the indoor air quality management follow up and accountability responsibility is that of GSA. EPA is still in the process of securing mid construction sampling funds however during the EPA/GSA discussion it was confirmed that the follow up process with the contractor be done through GSA. In addition to the pre-construction sampling GSA has also asked their third party Env. Consulting firm to add a visual inspection twice a week to determine if the construction space is under negative air pressure. The consulting firm will report this to GSA whom will report to EPA.
